

## Chapter III

### Nominal marking

#### 3.1 Introduction

This chapter discussed the nominal markings in central Ifugao language. Table 3.1 shows the summary of nominal markings and the occurrence of the nouns in term syntax. It is then followed by short discussions on each of the specific nominal markings and some illustrative examples. The discussion will start with pronominal markings and ends with common nouns markings.

### 3.2 Personal pronoun forms

Personal pronouns are marked differently. All three classes of singular pronouns (first, second, and third person) are marked as ergative-absolutive; Dual, first person plural inclusive, and third person plural are marked as nominative-accusative, and; first person plural exclusive and second person plural are marked differently or tripartite. Table 3.2 show a comparative used of personal pronouns and the case each group of personal pronoun marks.

Table 3.2 Examples of the use of pronominal

3PL	Hinonpalda <b>didah</b> 'They hit <b>them.</b> '	Indatnan <b>dida</b> 'He gave it to <b>them.</b> '

The true nature of some of the different pronouns, whether in free form or endclitic, could not be established definitely, specifically the bi-syllabic and three-syllable pronouns. Only the monosyllabic pronouns could be established as endclitics. In the meantime, all the bi-syllabic and three-syllable personal pronouns are encoded in this paper in their free forms, without suggesting their true form.

### 3.3 Case markers for personal names

Central Ifugao language marks personal names whether they are definite or indefinite; and singular, plural (two or more individuals), or group (of individuals taken as one). Personal names referring to two or more individuals is limited to definite persons only, and do not occur as indefinite or unknown individuals. Singular and plural personal names are marked as ergative-absolutive; and personal names referring to a group of individuals taken as one are marked as term. **hi** marks names referring to singular definite persons; **han hi** marks names referring to singular indefinite persons and as ergative-absolutive; and **da** marks names of two or more (plural) definite persons and as ergative-absolutive. While **da** marks names referring to groups of definite persons; and, **han da** marks names referring to group of indefinite individuals both as term. Personal names referring to either definite or indefinite singular or plural occurring as A argument are unmarked or Null ( $\Theta$ ). The following examples illustrate these.

#### 3.3.1 Case markings for definite and indefinite personal singular names

The language makes use of **hi** to mark personal names referring to singular definite persons occurring as either subject of intransitive clauses or an object of transitive clauses and may be classified as ergative-absolutive pattern. Examples (3.1) and (3.5) illustrate this. While **han hi** is used to mark singular indefinite persons and can occur in all arguments and it may therefore Term pattern. Examples (3.2) and (3.6) illustrate this.

### 3.3.2 Case markings for definite and indefinite names referring to two or more personal names of individuals (plural)

The language also makes use of **da** to mark names referring to definite two or more individuals (plural nouns); **han da** to mark names referring to singular indefinite persons and both as ergative-absolutive. Consider example (3.8) to (3.12). Contrast them with Example (3.7). Examples (3.13) and (3.14) are ambiguous in meaning, and (3.15) is ungrammatical.

### 3.3.3 Case markers for definite and indefinite singular nouns

The case markers for singular nouns are ***nan***, ***han*** and ***hi***; while *nadan*, *han* or *han da*, and *da* marks plural nouns. are the 'Ergative (ERG)' noun markers. /*nan*/ and /*han*/ mark singular common nouns and human except kinship terms; but /*nan*/ marks definite nouns, while /*han*/ marks indefinite nouns. The case marker /*hi*/ and /*han hi*/ are used mark noun phrases acting as the subject in intransitive sentences and the patient-like noun phrases in transitive sentences referring to personal names and human referred to by kinship terms; /*hi*/ marks definite noun phrases, and /*han*

**hi/** marks indefinite noun phrases. The examples (3.16) to (3.23) below illustrate usages with common nouns, and examples (3.25) through (3.29) illustrate their usages with kinship term and personal names. Note that example (3.24) is not allowed in the language.
